```

Added additional remote urls to get cupport with it too [remote "drupala11yInvest"] url =  
/Users/oleksiibondarenko/Sites/remote/user\_guide/source/uk fetch =  
+refs/heads/:refs/remotes/drupala11yInvest/pushurl =  
/Users/oleksiibondarenko/Documents/GitHub/content/docs/ua/.code-of-conduct\.md

## Questions ands notes during meeting 07 08:01

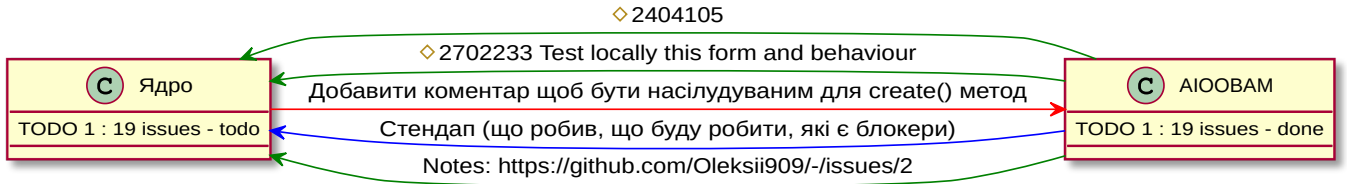

Що це за файли і чи може біти їх вміст нам корисним та для яких цілей.

```
docker-compose.yaml
Makefile
vendor
```

Notes in Github:

### Questions and notes during meeting 08-2020/11 10:51

How to implement dependency injection for routing controller? User story: I have file `mymodule.routing.yml` it defines some route with custom path `/myroute-path` It defines `_controller: '\Drupal\mymodule\Controller\MyController::getMyMethodToGet'` Inside that method are code: `'#labelText' => \Drupal::service('othermodule.service_name')->otherModuleMethod(),` `phpcs givig` Error: `WARNING | \Drupal calls should be avoided in classes, use dependency injection instead`

Solution ->

**Jedihe** 18 hours ago

In summary:

```
public static function create(ContainerInterface $container) {
    $instance = parent::create($container);
    $instance->someService = $container->get('some_service');
    return $instance;
}
```

(edited)
